# Coastal Building Services, Inc.

Your Partner in Hospital & Medical EVS Services

...we look forward to working with you and your team

We repeatedly meet and exceed the regulatory standards and guidelines put forth by the Joint Commission for proper cleaning and sterilization of each medical facility we serve. Moreover, our highly trained and proficient staff understand that their job is not only to clean the hospital, but when called upon, interact with the patients they meet, in a professional yet friendly manner. This is a result of our tireless effort to recruit and train the best employees.

Once our team members meet the criteria of our hiring practices, our Campus Directors ensure that ongoing proactive management, safety, compliance and client standards are met. As a result of pairing both a superior cleaning standard and work ethic with a team of courteous and hard working individuals, we have become the company hospitals, surgery centers, medical office campuses and healthcare providers call first to meet their housekeeping needs.

## What Our Customers Say

"They have lived up to every commitment made to my hospital and run an efficient and effective service that has led to huge improvements in the cleaning and appearance of our facility.

Outstanding leaders built a tremendous service operation at my facility."

CEO-Tenet Healthcare

Let us help you improve HCAHPS, reduce cost and waste and reduce the risk of HAI.
